

BLOWN FILM LINES AND COMPONENTS

Extron-Mecanor has 30 years' experience in design, production and maintenance of blown film technology. Mono- and multilayer films from thin masking films to packaging films and heavy-duty sack films are part of the product range. Multilayer co-extrusion line produces film with excellent barrier properties, especially used for food packaging with long shelf-life.

Extron-Mecanor offers turn key solutions, training for users and preventive maintenance to keep your production running as efficient as possible. Blown film line delivery can cover every machine from silo to storage.

- **Blown film lines from 1 to 11 layers**
 - 3 layer lines - Products: silo stretch, shrink and lamination films
 - 5 layer lines - Products: twist wrap and low barrier films
 - 7-11 layer lines - Products: high barrier films with EVOH, EVA, PA etc., for food packaging
- **Output from 10 to 1 000 kg/h**
- **Line width from 300 to 3500 mm**
- **Flexible scope**
 - Adjustable extruder and packing layout
 - Line delivery can cover every machine from silo to storage
 - Partial deliveries also possible
